

ECOWOOD - THE FUTURE WOOD

CATALOGUE

TOP COMPOSITE TIMBER PRODUCTS

What is EcoWood?

Ecowood is a WPC (Wood Plastic Composite) material made from 70% plantation forest wood and 30% additives and Plastic.

The 70% wood part of Ecowood is from plantation grown wood. Sawmill waste is collected and turned into wood flour. It then combined with virgin and/or recycled plastic resin, and blended with pigments to make pellets of more than 20 different colours. These pellets are then combined to make a range of products of various colours through a heated extrusion process. The elements and the way they are combined make Ecowood a very durable, stable, attractive, easy to use, recyclable building product.

Ecowood can use for interior and exterior architectural decoration such as outdoor wall panelling, indoor wall panelling, ceiling panel, roofing, louver, flooring, decking, Skirting and much more.

Save our Planet

At Ecowood , we support in using sustainable farm trees.
We are proud to announce that our EcoWood composite products have been accredited by

- Malaysia Green Building Confederation
- Singapore Green Building Council
- Green Building Council Australia

Also, our quality system for design and manufacture has been reached the requirement of ISO 9001:2008

The Manufacturing of Ecowood Product

With its unique formula and manufacturing technics, EcoWood materials are extruded into designed shape and style according to the mold installed. Similar to timber, EcoWood WPC products can be drilled, cut, planed and colored.

Application

Ecowood WPC products can be applied to indoor and outdoor areas as wall panels, sun shading decking, aluminum-WPC system, and fencing & railing.

Architecture Design

From private areas to public buildings or hotels/resorts, Ecowood WPC products were chosen by global users, architects and landscape designers. The exquisite designs and creative applications of Ecowood WPC products provided users unfathomable appeals of visual sense.

AVAILABLE COLORS

Ecowood uses only the finest raw materials to produce

Ecowood products represent the ideal alternative to natural timber. Manufactured predominantly from natural wood, our products help to prevent forest depletion through the sustainable use of recycled material and energy management.

Ecowood's Advantages

Insect Resistant	Environmental Friendly	Weathering Resistant
Fire Resistant	Longevity	Paintable
Water Resistant	Nail/Screw Fixing	Recyclable

Being at the forefront of global composite timber technology, we are proud to be the chosen composite timber supplier of leading national and international architects, designers and builders. Our versatility and product performance are instrumental to the continued success of various projects completed within Vietnam and overseas..

IMAGINE WHAT ECOWOOD COMPOSITE PRODUCTS CAN DO

- Cladding
 - Outdoor Panels/Cladding
 - Decking
 - Sun Shading/Pergola
 - Ceiling
 - Fencing/Railing
 - Gates/Huts
 - Decorative Garden
 - Indoor Flooring
 - Finishing Accessories
- The possibilities are endless

OUTDOOR PANELS/CLADDING

Material: Wood and PVC Composite

Ecwood wall panel can meet most outdoor application requirements with our experienced R&D team. It can add more features to the appearance of building by providing the natural wood grain and texture, fire retardant, anti-UV, water resistant and low maintenance costs.

Specific design and proven performance make Ecwood products an excellent choice for users. Ecwood products combine with high quality and competitive price to set a new industrial standard for value.

FLOORING

Material: Wood and PVC Composite with a "durable" exterior layer of vinyl (PVC)

WPC flooring, with its eco-friendliness and free of formaldehyde and heavy metal elements, has become a popular choice for interior home decoration. With its various wooden grain and colors suitable for different household styles, we are confident to help you create a healthy and warm house for you.

- Abrasive resistant, self-clean, environment protect;
 - Fire resistant and mute noise;
 - Resist impact, anti-skidding and shock absorbing;
 - Restrain the exist of mould, form-stable, anti-cracking and low in swell ratio;
 - Soft and comfortable, high resilience;
 - Completely waterproof;
 - Dramatic different planks, with deep embossing and handscraped;
- Good moisture resistance
